UWR with BACK PANEL

Spacesaver Universal Weapons Rack Back Panel Accessory Kit

Just when you thought the Universal Weapons Rack was at its peak in flexibility, Spacesaver introduces a new level of flexibility that will increase your ability to be ready and secure, more than ever before.

New Feature, Same UWR

Add the new back panel kit to any existing Spacesaver UWR cabinet (except the Mini and 18" cabinets) while maintaining the same industry leading features the military depends on:

- Because it fits into existing cabinets, the bi-fold doors are still completely retractable into the cabinet.
- Maintains the highest level of security for your weapons, both OPNAVINST 5530.13C and AR 190-11 military requirements.
- Does not compromise or negate the NSN certifications that all Spacesaver UWR cabinets are assigned.

Total UWR Compatibility

Spacesaver designed the new back panel to ensure you would not have to purchase new cabinets to accommodate this new feature. You can be confident that the new back panel is completely compatible with:

- All existing standard weapon rack designs (excluding mini and 18" over storage cabinets).
- All existing weapon rack barrel support and receiver brackets.
- All existing standard weapon rack bases.
- With two tier intermediate shelves.

Please contact your Spacesaver representative for complimentary space-planning services and pricing. Please visit uwr.spacesaver.com for more information.
